MICHAEL'S FAVORITE TOPIC:

Debunking Hell, the End Times, Inerrancy, Conversion Therapy, and Other Fake Faith Claims: Why It Matters

Claims of fake news dominate today's politics. Fact checking is key. But what if we used history to fact check the major faith claims of American Christianity? What would prove false? What would remain? What would we rethink? What does our country's religious views say about us, our concept of God, and the world we strive to build?

Michael leads his audience on an illuminating journey that uncovers 12 historically inaccurate faith claims of our day and explains why they are harmful. Michael uses historical facts and the spirit of universal love to expose fake religious "news" and reveal a non-religious, inclusive path of Jesus.
